

Last year some of our members (Cooking Lake Sailing Club), including myself, assisted your staff or volunteers by providing a support boat so lake samples could be taken. Without the work done by ALMS it is doubtful that the history of the lake could be obtained. Cooking Lake has suffered a significant loss of water over the past 7 years. The level is so low now that most of our sailboats cannot be used at the lake. The 2007 Western Canada Summer Games were to be held at Cooking Lake. Unfortunately the water sports have been moved to other locations.

Hopefully the work done by ALMS will result in a public awareness that may help restore lake levels.

Thank you on behalf of our club.

Gary Stuart
Secretary/Treasurer
Cooking Lake Sail Club
